

# Healthcare Services

## From Our Founder

Katmai Solutions began with the idea of assisting small agencies with their emergency management and public safety needs. Our staff is well familiar with the struggles of one- or two-person departments. With many public sector and hospital officials wearing multiple hats daily, plan writing, training, and exercises can take a back burner to day-to-day tasks.

Our “menu” of fixed price services are designed to supplement, on a task or hourly basis, to free up staff time for other pressing priorities. In addition, general consulting services are available for our clients where the need does not fit into a pre- defined project.

We believe in transparency of cost and removing barriers to assistance with projects and tasks. These promotional packages are available for attendees through the 2023 Preparedness Summit. Contact a staff member for full terms and conditions.

Project Management Professional Candidate  
Extensive Public Health Planning and Exercise  
Design  
Tribal and Rural Healthcare

## EOP Review and CMS Packaging

As a part of their healthcare offerings, Katmai Solutions provides services including plan review and development, training and exercise, and After-Action reports and improvement plans. As a starting point to review your preparedness program, we will evaluate current or draft Emergency Operations Plans and provide recommendations to fully update the document. Our recommendations will comply with current FEMA, CMS, and Joint Commission guidance.
