SOLUTIONS

# Our Services

## Planning

Katmai Solutions offers planning services to both private and public sector entities. Emergency Planning is the cornerstone to effective emergency preparedness, response, and recovery.

### Hazard Mitigation Planning

Hazard mitigation planning reduces loss of life and property by minimizing the impact of disasters and is a prerequisite to receive certain types of non-emergency disaster assistance. We work with our clients to develop Hazard Mitigation Plans that comply with requirements and procedures outlined in 44 CFR Part 201.

### Emergency Operations Planning

Successful operations occur when organizations know their roles, understand how they fit into the plan and can execute the plan. We work with our clients to conduct a community-based planning process that represents the actual population in the community and involves community leaders and the private sector using guidance contained in the current version of the FEMA Comprehensive Preparedness Guide (CPG) 101.

### Continuity of Operations Planning

Planning across the full range of continuity operations is an inherent responsibility of every level of government and across the whole community. We work with our client to develop continuity of government and continuity of operations plans using the FEMA Continuity Guidance Circular to appropriately integrate and synchronize continuity efforts.

## What We Do

Our focus is to be your partner in emergency management – there when you need an outside perspective or simply a capacity boost.

## Our Approach

### Strategic

Forward-thinking, we help our customers step back and approach projects/issues in a way that helps them to understand what is important today, and what they need to do to continue to be successful in the future.

### Professional

We are reliable, accountable, and set extremely high standard for every project we take on. We care about every aspect of our business and yours and we strive to provide efficient and organized service to every customer every time!

### Responsive

As a small business we are very agile, flexible, and adaptable. We tailor our approach to the needs of each client to ensure we provide the right service, at the right time, in the right place.

SOLUTIONS

# Our Services

## Project Management

Katmai Solutions provides project management services for various types of public safety, emergency management, and infrastructure initiatives. Often, in house staff do not have the resources available to manage initiatives and new projects while able to complete regular duties.

- Planning, Exercises, and emergency management centric projects
- Infrastructure solutions, such as radio, broadband, and other networking applications
- Business analysis, process mapping, and software/data migrations

## Grant Program Management

The past several years have brought an unprecedented surge in federal dollars resulting in a complex landscape to be navigated by state and local governments. We help clients to successfully research, pursue, and manage grants regardless of the grantor, grant type, or project complexity.

## Training and Exercise

Katmai Solutions specializes in training and exercises for local and state governments, first responder agencies in the private sector. It is essential that employees and volunteers receive world-class training and participate in well-planned exercises in order to be ready for events and incidents that may occur in the future.

### Training Courses

- ICS-300: Intermediate ICS for expanding incidents
- ICS-400: Advanced ICS for complex incidents
- 191: EOC/ICS Interface
- 427: CERT Program Manager
- 428: CERT Train the Trainer
- 950: Incident Commander Position Specific
- 962: Planning Section Chief Position Specific

Please contact us for course availability. Most courses can also be delivered virtually.

### Exercise Design, Conduct, & Evaluation

Exercises allow for individuals to practice what they have learned in training in a realistic, but no-fault learning environment. Exercises range from table-top and discussion based in a room or virtually, to full-scale exercises in the field. We can plan and manage exercises that are aligned with Homeland Security Exercise and Evaluation Program (HSEEP) principles and provide all appropriate documentation and after-action reports. Exercises are always custom designed based on the objectives of the agency.
